Professional Summary

Motivated and enthusiastic aspiring Software Engineer with a strong foundation in Python, SQL, Django, database management, and Artificial Intelligence. Passionate about software development with hands-on experience in developing real-world applications. Quick to learn new technologies, with strong problem-solving, analytical, and debugging skills, committed to delivering high-quality software solutions. Seeking an opportunity to contribute to organizational success while continuously enhancing my technical expertise and growing as a software professional.

Professional Experience

Infosys Springboard Virtual Internship 7.0

2026

Contributed to the development of a Secure File-Sharing System with user authentication and file management features. Assisted in implementing secure file sharing, access control, and backend functionalities. Participated in testing, input validation, and debugging to improve application security and reliability.

Education

Bachelor of Engineering (B.E.) – Electronics and Telecommunication Engineering

2027

Amrutvahini College of Engineering (AVCOE), Sangamner

Higher Secondary Certificate (HSC) – Science & Technology

2023

H.P.L. College, Krishnapur, Bidkin

Percentage: 58.50%

Secondary School Certificate (SSC)

2021

Sandipan Vidhyalaya, Shekta

Percentage: 87.40%

Technical Skills

- **Programming Languages:** Python, SQL, Linux(os)
- **Frameworks:** Django
- **Databases:** MySQL, MongoDB, SQLite
- **Tools:** Git, Visual Studio Code, MySQL Workbench
- **Operating Systems:** Linux (Ubuntu)

Certifications

- Python Full Stack Development
- Introduction to Generative AI
- Infosys Springboard Virtual Internship 7.0 – Python

Projects

AI-Assisted Smart Attendance System Using Face Recognition

2026

Tech Stack: Python, OpenCV, Artificial Intelligence, Computer Vision, Facial Recognition

- Developed an AI-powered Smart Attendance System using Python and OpenCV to automate real-time student identification through facial recognition.
- Implemented real-time face detection, recognition, and automated attendance recording, reducing manual attendance effort while improving accuracy and efficiency.

- Designed and integrated a secure attendance database for reliable data storage, data integrity, and efficient record management and retrieval.

Secure File Sharing System

Tech Stack: Python, Django, SQL, HTML/CSS, Cryptography, Authentication

- Developed a secure web-based file sharing system using Python and Django, enabling authenticated users to upload, share, and download files securely with encryption and access control.
- Implemented user authentication, file protection, and secure data management to prevent unauthorized access and improve confidentiality.
